4. ELEMENTS OF THE TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE

The Transparency and Business Ethics Program (PTEE) aims to publicly declare THE COMPANY's and its Shareholders' commitment to ethical and transparent conduct toward its stakeholders and to conduct business in a responsible and safe manner, operating under a philosophy of **“zero tolerance”** toward acts that contravene our corporate principles.

4.1. Identification and Assessment of Corruption and/or Transnational Bribery Risk (C/TB)

To manage Corruption and/or Transnational Bribery Risk (C/TB), THE COMPANY has established a risk assessment methodology for the C/TB Risks to which it is exposed, enabling the identification, detection, prevention, and mitigation of C/TB Risk associated with its activities. This methodology is described in Procedure P15-06, **“Guide for the Identification, Assessment, and Updating of Risks and Opportunities.”**

Records of the C/TB risk assessment are documented in the Risk Matrix for each process, listing each identified risk together with its assessment and the controls applied for its mitigation.

4.2. PTEE Compliance Policies

The following are the general, mandatory guidelines for the proper operation of the Program, intended to guide the conduct of THE COMPANY, its Employees, and other stakeholders.

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03

In furtherance of this guideline, THE COMPANY establishes that:

Employees, Shareholders, Suppliers, Intermediaries, and Contractors of THE COMPANY **must not** request, accept, give, offer, promise, or authorize sums of money, anything of pecuniary value, or any other benefit or advantage in exchange for a national or foreign public official performing, omitting, or delaying any act related to the exercise of his/her functions in connection with a national or international act, business, or transaction.

Likewise, THE COMPANY carries out Program audit activities and disclosure/training activities necessary to mitigate risk and ensure the Program's effectiveness.

4.2.2. Corporate Policy for the Engagement of Suppliers, Intermediaries, and Contractors in International Transactions

The procurement of goods and services carried out by THE COMPANY within the framework of international transactions shall be conducted under the criteria established in the Procedure for the management, selection, and evaluation of domestic suppliers P10–03, and Procedure for the selection, evaluation, and re-evaluation of foreign suppliers P10–05, through a formal process based on the principles of responsibility, transparency, quality, objectivity, ethics, and in compliance with applicable anti-corruption and anti-transnational bribery laws.

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03
Issued by: General Management	Date of Issue: April 30, 2021	Last Revision Date: February 28, 2026	L/C F

Suppliers, Intermediaries, and Contractors of THE COMPANY may not give, offer, promise, request, or accept benefits of any kind to/from a Foreign Public Official, where such conduct may be considered an incentive or reward for the official to perform, omit, or delay any act related to the exercise of his/her functions in connection with an international act, business, or transaction.

4.2.3. Corporate Policy on the Giving and Offering of Gifts or Benefits to Third Parties

In order to prevent actions such as giving, offering, or providing gifts or benefits to a National or Foreign Public Official from being interpreted as acts of Corruption or Transnational Bribery under this Compliance Manual, THE COMPANY establishes, as an internal guideline, that it is **not permitted** for Employees, Shareholders, Contractors, Intermediaries, and/or Suppliers to give gifts, directly or indirectly, on behalf of THE COMPANY to any National or Foreign Public Official, even if considered occasional, exceptional, or exclusively related to the official's employment.

4.2.5. Corporate Policy on Expenses Related to Entertainment, Meals, Lodging, and Travel

Considering the objectives of the Transparency and Business Ethics Program, THE COMPANY establishes that Employees, Shareholders, Intermediaries, Contractors, and/or Suppliers are **not permitted** to incur, directly or indirectly, on behalf of THE COMPANY, expenses for entertainment, meals, lodging, or travel for unauthorized third parties, and specifically for National or Foreign Public Officials, where such expenses could be interpreted as a bribe intended to induce such official to perform, omit, or delay any act related to the exercise of his/her functions.

4.2.6. Corporate Policy on Political Contributions of Any Nature

THE COMPANY understands “Political Contributions” as the provision of sums of money, items of pecuniary value, or any other benefit in favor of a political party, political candidate, or political campaign.

As a corporate guideline, THE COMPANY establishes that Employees, Shareholders, Suppliers, Intermediaries, and Contractors are **not authorized** to give, offer, or promise contributions of any nature to political parties, political campaigns, or to third parties linked publicly or privately to them, on behalf of THE COMPANY. - Seeking from THE COMPANY, in any manner, reimbursement or total/partial recognition of their Political Contributions.

4.2.7. Corporate Policy on Donations

Employees and Shareholders of THE COMPANY may make donations on behalf of THE COMPANY, provided that such donations are authorized by the Shareholders' Assembly and comply with regular procedures to ensure such conduct constitutes Charitable Donations, i.e., donations made in good faith for charitable purposes, directed to non-profit organizations, and without giving rise to improper advantages or benefits related to a specific national or transnational business or transaction of THE COMPANY.

Charitable Donations, as defined above, shall be made in compliance with all applicable laws and regulations, especially those related to tax matters.

The non-profit organization that is to receive a Charitable Donation shall, in all cases, be subject in advance to the applicable Due Diligence procedure.

- m. Design methodologies for classification, identification, measurement, and control of C/TB Risk that will form part of the PTEE.

5. STAGES OF THE TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE

The PTEE includes the following stages to identify, prevent, control, and manage Corruption and/or Transnational Bribery Risk (C/TB) and the consequences of its materialization:

1. Identification of C/TB Risk
2. Identification of C/TB Risk Factors
3. Measurement or assessment of C/TB Risk
4. Control and monitoring of the Compliance Policies and the PTEE

5.1. Identification of C/TB Risk

To identify, assess, control, and mitigate C/TB Risks, THE COMPANY adopts the methodology described in Procedure P15-06, “**Guide for the Identification, Assessment, and Updating of Risks and Opportunities,**” and records the Corruption and/or Transnational Bribery risks in the Risk Matrix by process.

Likewise, THE COMPANY applies complementary methodologies such as periodic Due Diligence procedures, Segmentation procedures, and Compliance Audit procedures to identify and assess C/TB Risk.

5.2. Identification of C/TB Risk Factors

In the process of identifying and assessing C/TB Risk, THE COMPANY adopts the following classification of C/TB Risk Factors:

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03
Issued by: General Management	Date of Issue: April 30, 2021	Last Revision Date: February 28, 2026	L/C F

a. Third-Party Risks: Refers to the counterparty—whether a natural person or a legal entity—with whom THE COMPANY has commercial, business, contractual, or legal relationships of any kind, including:

- *Employees*
- *Suppliers, and*
- *Intermediaries*

b. Economic Sector Risk – Specific Economic Activities: The DANE classification (National Administrative Department of Statistics) shall be used as a reference, corresponding to the economic activity codes described in the detailed structure of the International Standard Industrial Classification adapted for Colombia (ISIC – CIIU), i.e., a categorization of economic activities by production processes that classifies statistical units based on their main economic activity, in order to facilitate a set of activity categories usable for grouping and analysis.

c. Country of Operation Risk: Refers to the geographic area in which the counterparty conducts its activity, as well as the place where it resides or operates. Accordingly, a rating is developed for such jurisdictions to identify cities or countries with high corruption perception indexes.

d. Company Size Risk: For purposes of business size classification, the criterion shall be the counterparty's annual ordinary operating income, as follows:

- Microenterprise
- Small enterprise
- Medium enterprise
- Large enterprise

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03
Issued by: General Management	Date of Issue: April 30, 2021	Last Revision Date: February 28, 2026	L/C F

- Natural Person

e. Legal Nature (Legal Form) Risk: Refers to the characteristics that determine the applicable legal regime of an organization, company, or entity, classified as:

- Central administration (National Public Sector)
- Local administration (Departmental and/or Municipal Public Sector)
- Sole proprietorship
- Non-profit entity
- Solidarity economy organization
- Corporation (S.A.)
- Limited partnership by shares
- Foreign company
- Limited liability company
- Simplified stock company (S.A.S.)
- Natural Person

5.2.1. Segmentation

The model used for segmentation and classification of C/TB risk factors and for the detection of red flags follows the **DELPHI methodology**, whereby an exposure value to C/TB risk is assigned to each qualitative and quantitative variable analyzed or segmented, enabling recognition of significant differences in characteristics, with the purpose of determining the behavior of each segment.

The defined segmentation methodology corresponds to an expert analysis based on a structured procedure that allows group consensus on the variables to be considered, the scores/weightings to be assigned to segmented variables, among others.

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03
Issued by: General Management	Date of Issue: April 30, 2021	Last Revision Date: February 28, 2026	L/C F

Segmentation, as the process through which elements are separated into groups presenting significant similar characteristics within them, makes it possible to differentiate one segment from another and, in turn, identify differences among the groups or segments. The detailed description of the segmentation process is contained in the methodological document and the technical document of the specialized provider.

Segmentation Exceptions: In accordance with the company’s risk appetite regarding ML/TF risk tolerance, only third parties whose transactions, carried out through any payment method, exceed one current legal monthly minimum wage (SMLV) will be included in the segmentation process. Transactions below the aforementioned threshold are considered to represent a low risk in this matter and may therefore be tolerated.

5.3. Measurement or Assessment of C/TB Risk

The methodology described in Procedure P15-06, “**Guide for the Identification, Assessment, and Updating of Risks and Opportunities,**” enables measurement of the likelihood of occurrence and the impact of inherent C/TB Risk. Additionally, it:

- a. Establishes the criteria for assessing inherent C/TB Risks.
- b. Describes the types of controls to reduce and mitigate C/TB Risks.
- c. Assesses C/TB Risk after the application of the defined controls, i.e., Residual Risk.
- d. Determines the risk response policy.

5.4. Control and Monitoring of the Compliance Policies and the PTEE

Periodic Due Diligence and Compliance Audit mechanisms are implemented to verify and evaluate the effectiveness of preventive actions and to adopt appropriate measures to mitigate C/TB Risks once they have been identified and detected.

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03
Issued by: General Management	Date of Issue: April 30, 2021	Last Revision Date: February 28, 2026	L/C F

Likewise, the following procedures are defined to control and supervise the Compliance Policies and the PTEE:

- a. Oversight by the Compliance Officer regarding the management of C/TB Risk in legal relationships with Government Entities and in international or domestic business or transactions in which THE COMPANY participates.
- b. Periodic performance of Compliance Audits and Due Diligence procedures, as determined by the Compliance Officer.

6. DUE DILIGENCE PROCEDURES

Due Diligence is intended to provide THE COMPANY with the elements necessary to identify and assess the C/TB Risks to which it may be exposed when it is preparing to establish any type of commercial or contractual relationship with a natural person or a legal entity.

Transnational Bribery Risk

Proper knowledge of THE COMPANY's counterparties or third parties (Due Diligence) involves periodic analysis of legal, accounting, and/or financial aspects, as well as verification of credit standing or reputation, prior to the commercial or contractual relationship with the counterparty and, when red flags are identified that warrant it.

Considering that Suppliers/Contractors/Intermediaries may be used to make and conceal payments related to bribes to Foreign Public Officials in the context of International Business or Transactions, Due Diligence shall be performed by the process responsible for contracting and managing the counterparty, under the following parameters:

A. Appropriate review of the specific qualifications of each Supplier / Contractor / Intermediary

Collect basic data and information regarding commercial background, reputation, and administrative, criminal, or disciplinary sanctions that have affected, affect, or may affect the subjects of the Due Diligence. This shall include Suppliers/Contractors/Intermediaries as well as potential third parties that may present C/TB Risk within the framework of the transnational transaction.

The procedure consists of:

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03
Issued by: General Management	Date of Issue: April 30, 2021	Last Revision Date: February 28, 2026	L/C F

1. Completion by the supplier/contractor of the “Foreign Supplier Registration/Update” form R 10-03-03, in which agreements are executed and adherence to corporate policies is confirmed, as follows:
 - a. Source of Funds Declaration
 - b. Security Agreement
 - c. Declaration of awareness of and adherence to Compliance Policies
2. Submission by the supplier/contractor/intermediary of the supporting documentation required by THE COMPANY for analysis in order to identify potential red flags.
3. Collection of information regarding commercial, accounting, financial, reputational, and sanction-related aspects (administrative, criminal, or disciplinary) that have affected, affect, or may affect the persons subject to Due Diligence, supported by verification against available public control and informational lists. Comply with the provisions of the Procedure for the management, selection, and evaluation of domestic suppliers (P10–03) and the Procedure for the selection, evaluation, and re-evaluation of foreign suppliers (P10–05).

B. Implementation and Maintenance of Financial Controls

Financial controls are effective tools to deter inappropriate behavior, increasing the likelihood of early detection and capturing highly useful information to ensure traceability and evidence of payments. Therefore, it is important to review transaction activity with a Supplier/Contractor/Intermediary to validate that high-value payments do not conceal indirect payments of bribes or gratuities to national public officials or Foreign Public Officials, such as the increased amounts recognized to a Contractor for intermediary services.

	TRANSPARENCY AND BUSINESS ETHICS PROGRAM – PTEE		M-01-03
Issued by: General Management	Date of Issue: April 30, 2021	Last Revision Date: February 28, 2026	L/C F

Accordingly, inspections, reviews, and audits are implemented to verify that financial controls operate properly and that all transnational transactions are accurately recorded in THE COMPANY's accounting and financial ERP system.

Depending on the assessment of identified risks, the application of financial controls may extend not only to cash payments but also to discounts, refunds, purchase orders, among others, which are also ways of compensating someone and paying a bribe. Therefore, financial controls shall apply across the entire organization and especially to the accounts payable and accounts receivable processes, where they must be applied permanently and mandatorily.

Corruption Risk

Since Employees may constitute a risk factor for corruption and bribery, potentially exposing THE COMPANY to reputational, legal, or operational risks, Due Diligence shall be prioritized for those Employees who participate in the activities of selection, evaluation, reevaluation, and management of counterparties (Suppliers, Customers, Employees), and the following shall be required:

- a. Prior to engagement, consult available public control and informational lists to identify red flags related to sanctions or legal, accounting, or financial records.
- b. During the hiring phase, Employees must sign their adherence to THE COMPANY's Code of Ethics and Conduct and, for positions where applicable, disclose any private interests that may create conflicts of interest.
